Birmingham c.1888 street maps

Midland Ancestors was given about 400 very detailed street maps of Birmingham and its surroundings that were surveyed by The Ordnance Survey around 1887-1888. Each map covers an area of about 500 yards by 350 yards, and the scale of 1:500 is such that pillar boxes, lamp posts and garden details can be clearly seen. When linked to addresses in censuses and in other records, you can begin to build a picture of the circumstances in which your ancestors lived.

All the physical maps have now been sold, but all are available as a downloadable pdf file priced at £5 each. There is a comprehensive index to maps which can be downloaded, listing streets, public houses, hotels, schools, churches and other places of interest, so you can work out which map you require.

Why not get someone else interested in their family history. This is an ideal book to record family history.

My Family History - A ten generation family research record book with pedigree charts

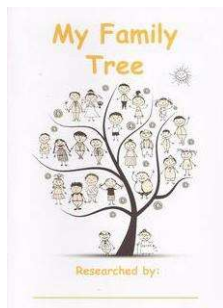

A4, 80 pages, ISBN: 978-1-906280-49-9

Ref V517v2, £9.99, Version 2 - Now includes a facility to record that the 1939 Register has been interrogated in respect of appropriate ancestors.

This record book is one of our best-selling products, ideal to get someone starting on their family history.

'*My Family Record Book*' is an efficient and attractive method of recording and displaying the result of family history research and a handy '*aide memoire*' to carry around when researching. The product is in two main parts; a ten-generation record book and a loose-leaf, two-sided ten generation pedigree chart, plus a system for recording re-marriages or new partnerships. There have long been several five generation versions available, but the complaint has always been that 'they don't go back far enough'. This publication is intended to resolve that problem. It allows the recording of ancestors back to 6x great grandparents; 256 marriages, 512 ancestors plus offspring's, stretching back to the early 1700's and beyond. All individuals are allocated unique reference numbers to mate entries in the record book with those on the pedigree charts. This new edition now includes a facility to record that the 1939 Register has been interrogated in respect of appropriate ancestors.
